ArrowLink™ SPD

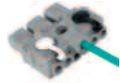

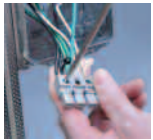

Stop pigtailing devices and improve speed, productivity and dependability on the jobsite

The ArrowLink™ SPD Advantage

Speed, Productivity, Dependability

Designed from the ground up with leading contractor input, the ArrowLink SPD connector simplifies wiring device installation, saving time and space by connecting directly to the building wire and eliminating wire connectors and pigtail leads.

Unmatched Speed!

The unique feed-through screw terminal design eliminates the time consuming steps of "pigtailling" from the installation process. No more wire connectors... no more wire leads... and over 50% labor savings straight to the bottom line!

Superior Connections!

ArrowLink's high-torque mechanical screw terminals create a secure means of quick termination of building wire directly to the connector, providing reliable terminations and superior continuity in both "dead head" and feed-through applications.

Consistency of Installation

The device of your choice comes with a factory installed and inspected ArrowLink plug side connector while color coded ArrowLink SPD connector terminal screws and caps minimize the possibility of field mis-wiring during installation.

More Space Inside the Outlet Box

The compact ArrowLink SPD system eliminates twist-on wire connectors and 18" of wire leads to free up 30% more space inside the outlet box!

Shipped Ready for Installation

ArrowLink devices are shipped direct to you within 5 days in eco-friendly 20 piece bulk packaging to reduce waste and improve efficiency on the jobsite.

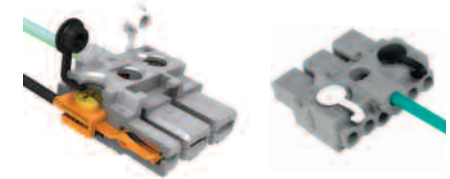

Stop Pigtailling Devices

The ArrowLink SPD connectors provide installation benefits where leaded connections fall short, eliminating pigtails at rough-in.

Quality, Dependability, Versatility

The patent pending ArrowLink SPD design provides reliable, high quality circuit connections and reduces installation time.

ArrowLink SPD Features:

- Screw terminals for reliable rough-in connections
- Accommodates #12-14 AWG solid or stranded wire
- 6 terminal feed-through capability
- Color coded terminal guards & screws
- 6" ground lead w/ terminal & captive ground screw
- Copper alloy contacts
